

Portfolio Level Metrics

Objective:

The bar chart shows different performance metrics comparison at portfolio level for a selected sponsor.

Navigation:

Interpretation

The bar charts provide the following information:

The above visualization shows five different performance metrics at portfolio level (All protocols visible in the protocol table).

- **PF-FKS:** The first group of bar shows the time taken between protocol finalization to first kit sent.
- **PF-FPI:** The second group of bar shows the time taken between protocol finalization to first patient in.
- **PF-100%FKS:** The third group of bar shows the time taken between protocol finalization to 100% first kit sent.
- **PF-LPI:** The fourth group of bar shows the time taken between protocol finalization to last patient in.

FPI-LPI: The fifth group of bar shows the time taken between first patient in to last patient in. The time here is measured in weeks.
