

Site Count Breakdown

Objective:

The tree map shows the site count breakdown at different levels at portfolio level (All protocols selected in the protocol table).

Navigation:

Site Count Breakdown

Interpretation

The tree map provides the following information:

It shows the site count breakdown in a hierarchy. The hierarchy is therapeutic area, clinical indication, phase and country. To drill down to any level, click on the bar. To return back to the default level, click on the horizontal black bar below the tree map (see Figure 2).
