MCC Metrics – Scatter Plot
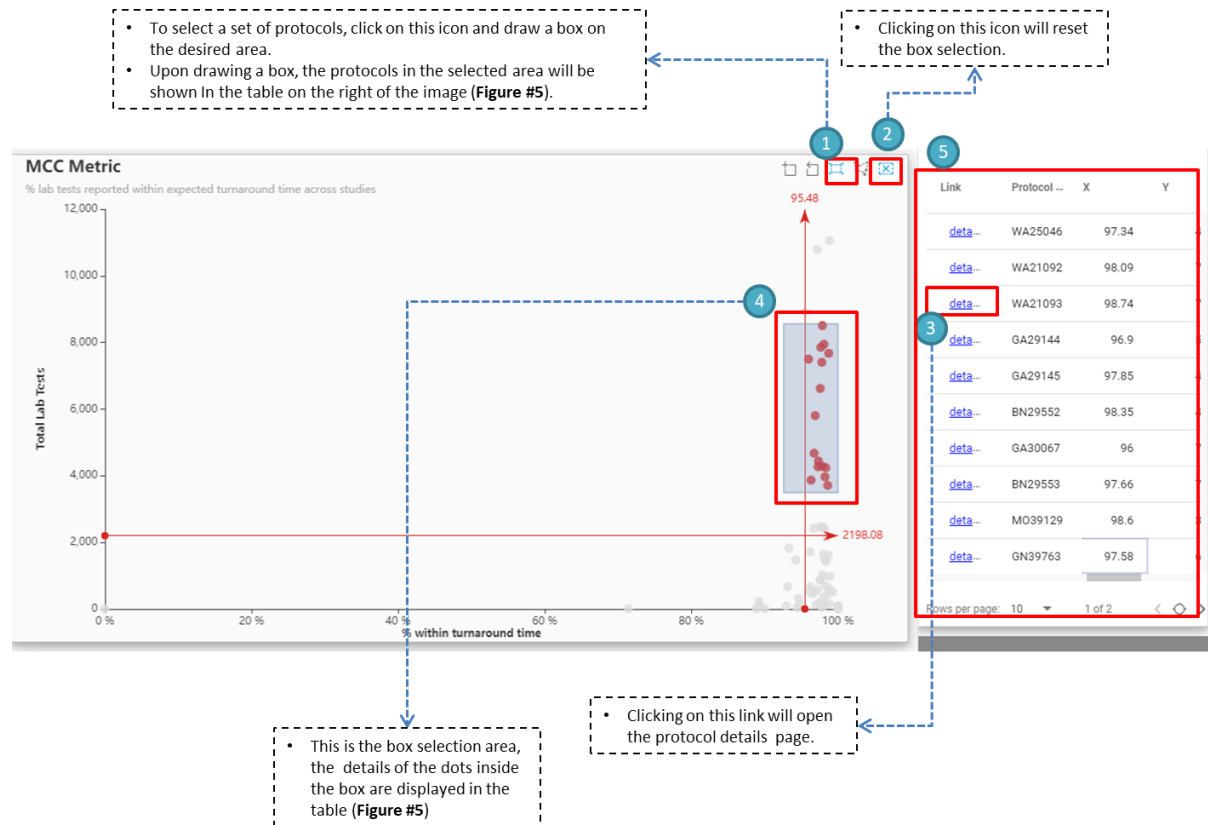

Objective:

The scatter plot shows clear outliers, each dot here represents a protocol.

Navigation:

- To select a set of protocols, click on this icon and draw a box on the desired area.
- Upon drawing a box, the protocols in the selected area will be shown In the table on the right of the image (**Figure #5**).

- Clicking on this icon will reset the box selection.

- This is the box selection area, the details of the dots inside the box are displayed in the table (**Figure #5**)

- Clicking on this link will open the protocol details page.

Interpretation

The scatter chart provides the following information:

- o The chart shows the outlier protocols
- o The box selection tool can be used to view details of the protocols
